ABSTRACT

This study investigates character of communication, and evaluates communication need of people, and handles relation between communication and modern conditions, and emphasizes technological lack on communication education. Because of social need, communication became social matter and governments contributed facilities of communication and set communication places for people to meet and to communicate. Education in the world use developed technology in any department and communication education especially necessities high technological facilities in schools because of modern conditions. Many high schools and universities have communication departments and most of them use contemporary technological facilities, but they are not sufficient. Communication departments in educational organizations in Turkey have computer classrooms and monitors and cameras and microphones and telephones and different softwares and others. Technology develops rapidly due to hopes of people and technological facilities in education can not catch developments and people always hope more.

Keywords: Communication education, technology, technological sufficiency, modern conditions.
